Relaxation in timeline for reporting of differential rights issued by Alternative Investment Fund :

As per the updated directive:

- The deadline for reporting differential rights not covered by Standard Setting Forum for AIFs (SFA) standards has been extended from February 28, 2025, to March 31, 2025.
- Fund Managers are also advised to identify and discontinue any rights that may impact other investors' interests to ensure compliance.

THE CYBER SECURITY AND CYBER RESILIENCE GUIDELINES FOR REGULATED ENTITIES (RES) IN IFSCS, ISSUED BY IFSCA ON MARCH 10, 2025, FOCUS ON ENHANCING CYBERSECURITY.

The key points are:

1. **Governance:** REs must establish a governance structure with clear roles and appoint a CISO or Designated Officer for risk management and incident response.
2. **Cyber Security Framework:** REs need a framework ensuring IT asset protection, including recovery strategies, risk mitigation, incident management, and regular reviews. An Information Security Policy covering asset classification, access control, and audits is required.
3. **Third-Party Risk Management:** REs must manage risks from third-party vendors, with regular reviews and audits.
4. **Communication and Awareness:** Continuous cybersecurity training for employees is necessary.
5. **Audit:** Annual cybersecurity audits by qualified auditors are mandatory, with incident reporting timelines (6 hours, 3 days, and 30 days).

Exemptions: Certain entities are exempt, including RE operating in form of a branch, REs with fewer than 10 employees, Global In-House Centres, and Foreign Universities.

Have you ever considered the future of your family through succession and family office planning?

At Catalyst Family Office and CSP Team, we are dedicated to providing valuable insights on family office and succession planning. As part of our commitment, we will be sharing a series of informative updates in our monthly newsletter. Here's a glimpse of this month's edition.

Feel free to reach out if you need more information or are ready to begin your succession planning journey.

Succession Planning: Because "We'll See Later" is Not a Strategy!

A few years ago, the Sharma family's Sunday lunch took an unexpected turn from a casual meal to a full blown inheritance dispute. Uncle Raj demanded a bigger share of the family business because he was the eldest. Aunt Neeta argued that years of decorating the ancestral home entitled her to ownership. And cousin Vikram? He just wanted to sell everything and move to Goa.

Why the chaos? Because their late father, Mr. Sharma had always dismissed succession planning, saying "You all can decide amongst yourselves." Spoiler alert: They couldn't. A similar situation unfolded in another family, where a 75-year-old matriarch known for planning extravagant celebrations, kept postponing the one thing that truly mattered, her financial legacy. Despite repeated reminders to update nominees, draft a will, and ensure a smooth transition of assets, she always shrugged it off saying, "There's Plenty of time for that right after tea and a nap." But life had other plans.

DEALS OF THE MONTH

Catalyst is acting as Trustee for one of its kind NCD issuance for a Company founded by Mahyco and Indigo Ag, USA namely Grow Indigo Private Limited for an issue size of INR 83 crores. The issuance is backed by various securities one of them being Carbon Credits.

What is Carbon Credits?

In agriculture, carbon credits incentivize farmers to adopt sustainable practices that sequester carbon in the soil or reduce greenhouse gas emissions, offering a new income stream and contributing to climate change mitigation. Farmers can generate carbon credits by implementing practices that reduce emissions or store carbon in the soil, such as reduced tillage, cover cropping, improved nitrogen management, and agroforestry. The Company in collaboration with their partner farmers, provides support, expert guidance, and introduces innovative farming techniques.

In India, The Central Government, or its authorized agencies, are responsible for issuing carbon credit certificates. These certificates are also tradeable.
